# MYLES BURROWS

Mistermburrows26@gmail.com

---

**EDUCATION:**

**Towson University, Towson, MD (Senior)**

- Major: Computer Science

  Relevant Coursework: Principles of Computer Organization, Intro to Cybersecurity, Computers and Creativity, Cryptography, Data Structures/Algorithms, Data Comm and Networking, Ethical and Societal Computer Science, Object Oriented Design, Artificial Intelligence, Design and Implementation, Software Engineering.

**PROJECTS**

- AI Tutor: Created a personal AI Python tutor using GPT-Nano and OpenAI's API. Users were to interact with it through command line to learn Python basics like syntax, loops, arrays, and data types. The tutor can teach lessons, quiz users, grade exercises, and help improve code. The project involved Python programming, using OpenAI's API, and managing code with Git and GitHub.
- ZenTask: Developed a task management app in Java and Kotlin with Android Studio and Firebase, allowing users to track tasks and earn experience points. Collaborated with a team of computer science classmates, using SCRUM, managing sprints, app requirements and project scope.

**ACTIVITIES & LEADERSHIP**

- President, Software Engineering Club
- President, TAPS
- Member, Chess Club

**WORK EXPERIENCE:**

**Prince George's County District Court (Summer 2025)**
**Landlord/Tenant Division**

- Digitized, organized, and validated records, supporting clean, reliable data for internal systems and reporting.
- Entered and verified operational data with strong attention to accuracy and process standards.
- Aided internal staff and users by organizing requests, routing issues, and supporting workflow processes, reflecting a customer friendly problem-solving mindset.
- Followed documented procedures to reduce errors and improve consistency across systems.

---

**Risse Brothers (Summer 2024)**

- Processed transactional data (sales, returns, exchanges) reinforcing data accuracy and operational reliability.
- Documented customer interactions and resolved issues.
- Collaborated with team members in a fast-paced environment, adapting quickly to changing priorities and business needs.

**TECHNICAL SKILLS**

- **Programming & Development:** Python, C++, Java, HTML & CSS
- **Design & Visualization:** Adobe Photoshop, Adobe Illustrator, Canva, Onshape (3D CAD modeling)
- **Productivity & Office Tools:** Microsoft Office Suite (Word, Excel, PowerPoint, etc.)
